CWNP® at Aruba Atmosphere 2016 in Portugal from May 23-26
The Largest Mobility Conference on Earth - Go Mobile. Go Cloud.

ALGARVE, PORTUGAL – May 22, 2016 – Organized by Aruba Networks, Aruba Atmosphere 2016 is one of the premier technical conferences and dubbed “*The Largest Mobility Event in Europe*”. It’s where mobility experts, salespeople, engineers, and C-level executives come together to exchange ideas, learn about emerging technologies and improve their skillsets.

One of the central themes of this year’s conference is on the value of continued education — on giving people access to certification training that will advance their knowledge and allow them to learn new ways to deploy and troubleshoot applications.

As a preferred Aruba Networks partner, providing training to their employees and reseller community, CWNP is honored to attend Atmosphere 2016.

This premier event will be held at the Nau Resort in Algarve, Portugal, from May 23-26, 2016. Representing CWNP are Heather Hobbs, Marketing Director, Rameshwar Nigam, General Manager of CWNP, Renzo Conserva, Americas Training Manager of CWNP, and Josie Miller, Operations Director. “The Aruba Atmosphere 2016 conference offers an exciting lineup of sessions across several categories that directly relate to our certifications and curriculum,” says Hobbs. “By learning about the latest trends and issues in the field and how people are solving them in new ways, we can further strengthen our wireless certification programs and ensure that they are the most rigorous and respected in the industry,” adds Josie Miller.

Beyond the numerous networking prospects this conference provides, Renzo Conserva says he is looking forward to attending sessions such as: *The Software-Defined Networking (SDN) Deep Dive*, *Enhance Network Security with Multi-Factor Authentication for BYOD and Guest Access*, and *The TEN Talks at Airheads: Digital Workplace Fundamentals*, among others.

“From product demos to mobile engagement to seeing the latest wired and wireless products and technologies shaping our digital workplace, Atmosphere 2016 is an ideal platform for CWNP to foster business relationships with the most influential design and development engineers,” says Rameshwar.
