## Dick Andersson Principal Network Engineer & CWNE

### **What got you interested in wireless?**

We need to go back 20-22 years to my studies at the Royal Institute of Technology in Stockholm. My main area was Radio communication. So, when I start working with Wireless it was almost like coming home.

### **How did you find CWNP?**

The CWNP program is known almost to everyone working within this area. It didn't take long after I started to work daily with wireless back in 2008 before I heard about the program/courses in blogs, websites etc

### **What do you like about CWNP compared to other programmes?**

First of all, it's vendor neutral. It is also the only place where you get 802.11 presented and described in such good and understandable way. The books that you have are among the best that I have ever read, and I have read a lot of tech. books

### **What are your plans for the future and why?**

I am here to stay. It happens so much within the wireless area right now. It will be interesting to see and follow the future and also be part of the journey.

# BIO

---

Dick Andersson has many years of experience in the wireless area.

For the first half of the 90's he studied engineering at the Royal Institute of Technology in Stockholm, where Radio Communication was his main topic.

He worked five years at Ericsson Radio Systems as a system engineer for Data Services over the 2:nd generation mobile networks.

After eight years as a traditional Routing and Switching engineer within the financial industry and six years with focus on the wireless side, he is now Senior Network Design Engineer at NASDAQ OMX Group, Inc for the wireless networking area.
