Jasper Cheng Earns a CWNE® — One of the Most Respected Designations in the IT Industry Today.

Cheng is the 154th Wireless Professional to Join the Certified Wireless Network Experts Ranks, the Prestigious Last Step in the CWNP Program

DURHAM, N.C., December 31, 2014 – CWNP, LLC (Certified Wireless Network Professional), has announced Jasper Cheng as the newest Certified Wireless Network Expert (CWNE®). Cheng becomes only the 154th person worldwide to hold this prestigious title, recognized as one of the 10 most difficult designations to earn within the IT industry. The CWNE certification assures that the newly certified wireless professional has mastered all of the skills required of, and measured by CWNP, including design, installation, configuration as well as the ability to administer and troubleshoot wireless network systems. CWNE professionals are typically at the pinnacle of their respective fields, skilled at advanced design, protocol analysis, intrusion detection and prevention, performance and quality of service (QoS) analysis, and spectrum analysis and management.

Based in Hong Kong, Cheng works as a Technical Manager for Pacific Century Cyber Works (PCCW). His main charge is to provide technical support for pre-sales and post-sales and he has to deal with different types of wireless LAN products from multiple vendors, such as Aruba, Cisco, Ruckus, and Xirrus. His numerous career highlights, including the implementation of a wide variety of products, such as cloud APs, lightweight APs, wireless controllers, network management systems, and network access control systems. In the Information and Communication Technology industry, Mr. Cheng has successfully handled spearheaded large-scale projects involving different wireless services, architectures and various wireless devices.

"CWNP is proud to name Jasper Cheng as our newest CWNE," said Brad Crump, General Manager of CWNP. "He completed all CWNP stages leading up to the Certified Wireless Network Expert and has proven his knowledge of 802.11 wireless networks and how they work everywhere," adds Crump. "We know this certification will help propel Mr. Cheng to the next step in his career."

"As of now, CWNP is the only organization to provide well-organized and vendor-neutral certification program in the realm of wireless LAN," says Cheng. "Being certified with such a great honor in the wireless LAN industry not only benefits my career development, but also helps me gain trust among my many customers." "Other vendor-based certifications only focus on the knowledge and skills specifically for their own products, but not the fundamental knowledge and concepts of the IEEE 802.11 standard itself," adds Cheng.
